Why UNISA

Master of Midwifery?

Why UNISA Master of Midwifery?

UNISA's Master of Midwifery is built around a clear distinction: Midwifery Health Technology Assessment (HTA) using up-to-date evidence, grounded in **Progressive Islamic values (Islam Berkemajuan)**.

This positioning supports graduates to lead improvements in **midwifery services, education, research, and policy, with strong relevance to Indonesia's health system needs**.

Graduate Profile

Graduates are prepared to take advanced roles as:

1 Midwifery Researcher

Conducts and manages interdisciplinary research, produces scientific publications, and integrates technological developments in midwifery care, services, and education, with strength in Midwifery HTA and Progressive Islamic values.

2 Midwifery Science Developer

Develops midwifery knowledge and practice aligned with midwifery philosophy, demonstrating critical, systematic, creative, innovative, and reflective scientific thinking, with excellence in Midwifery HTA.

3 Academic and Educator

Transforms and disseminates midwifery and maternal-child health knowledge and technology through teaching, mentorship, and scholarly work, grounded in Midwifery HTA and Progressive Islamic values.

4 Health Services Manager

Manages midwifery and maternal-child health services across healthcare settings, applying HTA-informed decision-making and quality improvement.

Vision

To become an excellent master program **in Midwifery Health Technology Assessment**, using the latest evidence, based on **Progressive Islamic values**.

Missions

1. Deliver education, research, and community service that are health-oriented and **HTA-based**, guided by Progressive Islamic values, to contribute to national development.

2. Strengthen progressive Islamic thought in health and midwifery scholarship and practice.

Learning Experience and Signature Strengths

Semester-based added skills (highlights):

Semester 1

Skills in **scoping review**, quantitative, qualitative, and mixed methods, plus support toward publication in accredited national or international journals.

Semester 2

Applied learning with offline components and outputs such as **policy brief writing, innovation outputs eligible for IP/HKI,** and **HTA studies**.

Semester 3

International exposure via **International Practice Project/ International Credit Transfer**, including courses and academic visits at partner destinations.

Semester 4

Joint supervision with international supervisors and strong encouragement for international publication; a publication pathway is explicitly promoted for thesis outcomes.
